

## 01 The Need for Safety in Healthcare Survey Findings

**1 in 4** nurses face physical assault at work, highlighting the urgent need for enhanced safety.

**40%** of healthcare workers have experienced violence, and

**80%** would feel safer with a badge.

## 02 How It Works: Litum Staff Duress RTLS

### RTLS Network

A robust RTLS mesh network with anchors and gateways is established to ensure seamless location insights.

### Badge Distribution

For use during duress situations, Litum's smart badges are distributed to healthcare staff.

### Staff Badge Assignment

Each staff member gets a smart badge, discreet yet powerful.

### Instant Alerts

A simple press sends an instant alert. Alerts notify security immediately.

### Location Detection

The system instantly pinpoints the tag's location within the facility.

### Response Protocol

Designated personnel receive the alert, allowing them to immediately to assist.

### Swift Action

Real-time location data guides security directly to the staff member in need.

## 03 Additional Features

### LenelS2 OnGuard Certification

The solution is fully compatible with LenelS2™ OnGuard®, offering seamless integration for enhanced security operations.

### Advanced Capabilities

Unlock the power beyond alerts with historical data and patterns to proactively prevent future incidents.

### System Customization

Customize duress triggers and alerts to align with specific facility needs.
